

SHEET 2

The Fly Baby's wings fold up against the fuselage enabling it to be stored in a single car garage or a car trailer. The wings can be folded or unfolded in about 15 minutes.

Some of the components used, such as the fuel tank and engine, were designed to be taken from the Piper Cub, which were cheap and plentiful in 1962. But even today, the total cost of construction can be well under

\$10,000!

AXLE (ROLL & GLUE)
